Dr W Harry Susilo

Abstract

Recently the among national- corporations have to refuse the misguide from the vision and missions on the heterogeneous- industrial firms, fail from the tight competitions, no-data and an incremental inventions. This analysis would be investigating the research gap within the human resource- comparative performance within source of employee value. The novelty research- result from the confirmed model have the powerful development of employee performance within an unique of an employee value that more contribution on body of knowledge on theory of knowledge- based view of the firm and the theory of upper echelons that its have integrated various fields within top managers competencies to long- run in business. Moreover, the research method was use the confirmed strategy in multivariate data analysis within an among the latent variables. The scholars were hope to contribution on the body of knowledge to the theory that conducted in this synthesis within the national construction- firms.

Keywords: Human resources-comparative, the construction national- firms, performance

BAB I. Introduction

The determinant factors within emerging market and the rigor competitions, knowledge sharing, provide big data, and the human resources performance within source of employee value, that have been could be confirm result of wide research on the national construction- venture (Day, Crown, & Ivany, 2017; Pittino, Visintin, Lenger, & Sternad, 2016; C.-J. Wang, Tsai, & Tsai, 2014; Z. Wang, Sharma, & Cao, 2016) (Graça, Barry, & Doney, 2016; Hau, Evangelista, & Thuy, 2013; Shelby, 2007) (Vivek, Beatty, & Morgan, 2012), (Hollebeek, 2012), (Harrigan, Evers, Miles, & Daly, 2017), (Bitter & Grabner-Kräuter, 2016).

Indeed, an analysis have the very poor-process of the impact to employee performance within source of employee value and the meaning in an among national constructions- firms as the result research from many scholars synthesis and contribution on body of knowledge, that some research gap that must be fulfill the novelty variables as the new models of the market- based human resources management research. (Bürkner & Lange, 2017; Darren, 2015; González, Rodríguez Gil, Martorell Cunill, & Merigó Lindahl, 2016; Ho, Nguyen, Adhikari, Miles, & Bonney, 2017; Husain, Dayan, & Di Benedetto, 2016; Järvinen & Karjaluoto, 2015; Lassala, Carmona, & Momparler, 2016; Stan De, Monique, & Guy Van, 2017; Straker & Wrigley, 2016; T. Thomas, 2015; Walmsley, 2016; W.-L. Wang, Malthouse, Calder, & Uzunoglu, 2017) The objective of this analysis should be synthesis the new- research model to fulfilling the research gap between the role of human resources within its impact on the employee performance. Hence, the focus of an intervening variables as develop of resource of employee value within a synthesis of results to contribution on the body of knowledge to the theory that used. (Demirkan & Spohrer, 2014; Geraerds, 2012; Järvinen & Karjaluoto, 2015; Kianto, Sáenz, & Aramburu, 2017; Kim, Cavusgil, & Cavusgil, 2013; Landroquez, 2013; Li, 2010; Malik, Pereira, & Budhwar, 2017; Matošková & Směšná, 2017; Obal & Lancioni, 2013; Ouakouak & Ouedraogo, 2017; Pittino et al., 2016; Senichev, 2013; Stone, Deadrick, Lukaszewski, & Johnson, 2015; Walmsley, 2016; Xerri & Reid, 2017)

The human resources within the value creation on the source of employee value an among national- constructions firms have many strategic plan to attempt the employee performance, within good manage

for winning the tight competition, the human resources- advantage on among national market for having the new- opportunity for reach the profit embedded on the business with create an unique value. Moreover, the strategic choices have done by managers for improvement firm performance within a good human resources and unique value creation(Bravo, Matute, & Pina, 2015; Kang & Lam, 2016; Mullen, Kelloway, & Teed, 2017).(Hamilton, 2011; Reid & Brady, 2012) (Poisson-de Haro & Bitektine, 2015; Z. Wang et al., 2016)(Aima, Susilo, Purwanto and Wiratih, 2015).

BAB II. Literature review

Recently, the scholar has in this synthesis was investigating the research- model to pursue the employee performance on conducted within the contributions for the body of knowledge on R-A Theory, the Upper Echelons' theory and theory of Knowledge based view of the firm for the competitions and holistic, also for the contributions in develop of the management implications to make the strategies within entire national construction venture. Moreover, in this inquiry for attempted the robust competitiveness advantage to leads the superior employee performance in national constructions business for the long- run.

The Upper Enchelons Theory, Theory of the Knowledge based View of the Firm and the R-A Theory also the Contributions on Body of Knowledge

The organization structure and incremental innovation could support employee performance and the strategic approach on HR management and making subordinate within efficiently process. The knowledge-based view of the firm theory and Upper Enchelons theory would helped to knowing and explaining the paradigm more to be sharp. Moreover, the R-A theory have some knowledge about competition entire firm in heterogeneous industries and the sustainable competitive advantage should have as the foundation of the venture to create the best structures, bundles and provide the top-organization's resources and its have smart- management within hybrid competitive strategy for achieving the employee performance within source of employee unique value.(Alisher Tohirovich, Changjoon, & Junghyun, 2017; Gabrielsson, Seppälä, & Gabrielsson, 2016; Shelby D. Hunt, 2013, 2015; Shelby D Hunt & Morgan, 1995; Krausert, 2017; Kumar & Yakhlef, 2016; Nor Shahriza Abdul, Mohamed Jalaldeen Mohamed, & Norshidah, 2012; Stan De et al., 2017; C.-J. Wang et al., 2014; Xiaohong, Chengfeng, Yanbo, & Gaowen, 2015; Zhao, Feng, & Wang, 2015)

The scholar was mentions to the grand theory to fulfill the research gap and its was make the contribution for the body of knowledge and gain the novelty the research result from an empirical research as follow, the figure 1 below:

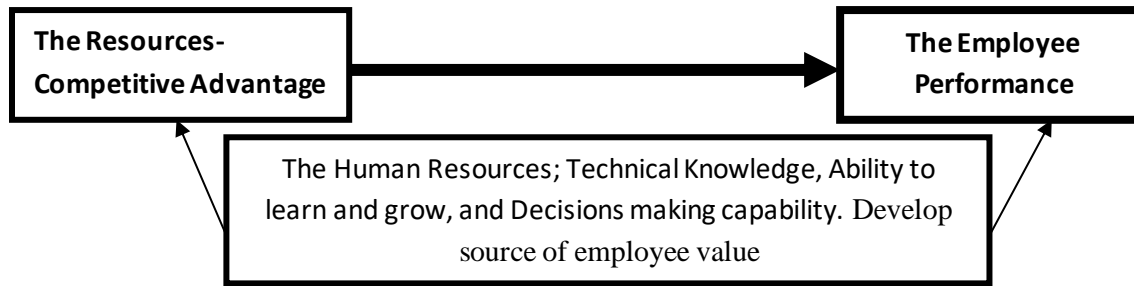

Figure 1. The Upper Enchelons Theory, Theory of the Knowledge based View of the Firm and The R-A Theory also Path to Contributions on Body of Knowledge

BAB III. The Framework and Hypothesis

Indeed, the research framework of Superior- Employee Performance within national constructions- Corporations should be to develop for fulfillment the research gap for finding the knowledge to improvement the superior- employee performance.(Chiang & Birtch, 2010; Gupta, Singh, & Bhattacharya, 2017; Munir, Rahman, Malik, & Ma' amor, 2012). Moreover, the scheme of research- framework as follow figure 2, below:

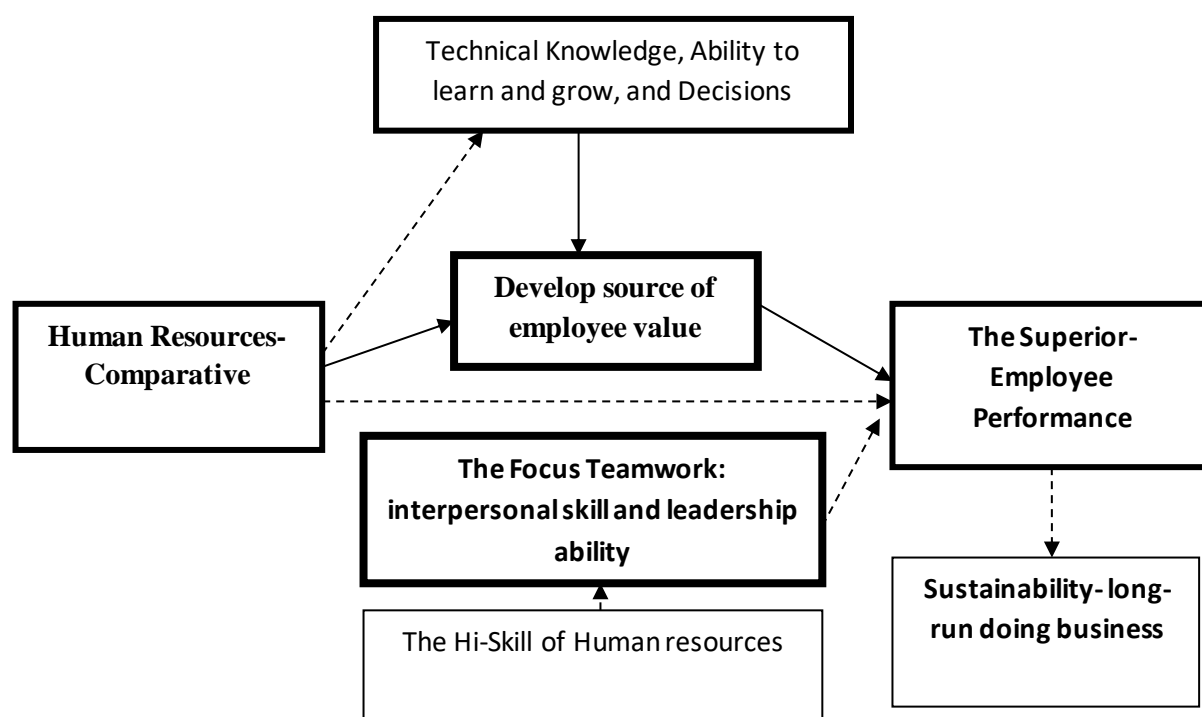

Fig.2. The Research Model to Pursue the superior Employee Performance with the develop source of employee value within National-Constructions Firms

(Source: Develop from an Author)

The hypothesis in these inquiries the conceptual research model, as follow:

H₁. The human resource comparative within national constructions firms is positively related to the develop source of employee value.

H₂. The develop source of employee value is positively related to the superior employee performance within the national constructions firms.

H₃. The Technical Knowledge, Ability to learn and grow, and Decisions within national constructions firms is positively related to the develop source of employee value.

BAB IV. Research method

Sample, data collection and Measurement of variables

The respondent for this research conducted within total sampling and the workers in national construction venture in Jakarta (Mathwick, Wagner, & Unni, 2010; E. Thomas, 2013). Moreover, The survey was conduct within the self administered questionnaire that uses the rating scale for entire latent variables to make the response for use the newest technologies consumers goods brand (Sekaran and Bougie, 2016). Hence, the tools- instrument have the independently cross-sectional collected method and conducted with the rating scale as an interval data scale (1 to 10 very agree). Hence, the validity and reliability construct test that conducted with measurement model in structural equation modeling among variables (Hair, Black, Babin and Anderson, 2010)(Evermann & Tate, 2016).

1. Data analysis

Data analysis, the Model of fitting and Hypothesis testing

The data analysis would conducted to the structural equation modeling, because entire the variables were latent characteristics. Moreover, the two step approach have pertains; measurement model and the structural hybrid full model and used the confirmatory strategies were conducted in this multivariate data analysis, with a testing the validity and the reliability construct, also synthesis the fitting model and hypothesis proved (Susilo and Yulius, 2017). The research result would have for the data analysis pertain: the sensitivity analysis: the test indicated did not have the outlier and missing value that conducted with SPSS and the z value <2.50 and an univariate and multivariate of normality test. Moreover, The goodness of fit research model could be analyzed within the indexed value. Moreover, the entire hypothesis confirmed was conducted with t value >2 .

BAB V. Conclusions and research contribution.

Indeed, our research result will successfully to confirm entire hypotheses, and the best value could be find to pursue employee performance on national- constructions corporations. The scholar hope the fulfillment the research gap within the new research model would effectively to achieve the employee value with the smart planning to develop some program. Furthermore, the research contributions were within 2 (two) area that pertain; first, the contributions for theoretical implications to the body of knowledge of the recourses advantage in human resource of the national- construction venture. Moreover, the conducted with **The Upper Enchelons Theory, Theory of the Knowledge based View of the Firm and the R-A Theory** as the explanations and predicted the relationship for the attempt the employee performance that its will investigate on the value- based research in management.

Acknowledgement

Thank you so much to the Expertise and Experience Learning Club, Faculty of Business and Management, University Of Persada Indonesia Y.A.I. To my colleague and students. To In Kind Workshops E&EL CLUB LABORATORY FEB UPI Y.A.I team.
