Reviewer 1:

(1) The paper needs to be written in IEEE style, not in APA style. (2) Some references will be better if replaced by the international references, for example for definition of learning motivation, and the variable that contributes to learning motivation. (3) Explanation about participants will be better to be moved to Methods parts rather than Result. (4) In the title there is "thermodynamic learning" but in the Introduction there is no explanation about "thermodynamic learning", why the thermodynamic learning need to be expose in the title.

Reviewer 2:

please check the citation style. SHould be the IEEE style
